NOTES:

- **Order information** is available for (most) DAF vehicle series from 01-01-2017 and later. For chassis drawings of older vehicles please consult the generic drawing archives on www.DAFBBI.com.
- **Special Requests:** deviations on vehicles from our standard product program due to Special Requests (called POV''), are not included in the on-line 3D-visualisation and downloadable content. If a Special Request is applicable to an order, its content is described in the bottom of the Vehicle Information-tab. More information about (custom) drawings request can be found here.
- **Bodybuilder Report:** to further support Bodybuilders with calculated chassis specific information (e.g. layout dimensions, chassis height and axle loads) the DAF dealer can generate a chassis-specific BodyBuilder Report. For more information about the Bodybuilder Report click here. A short version, which contains most essential information of the Bodybuilder Report only, is automatically supplied with every automated 2D-drawing request on the Downloads tab.
- **Share Configuration ID:** a 38-character string that enables sharing of a vehicle configuration before a DAF order number is available. A Share Configuration ID can be generated by a customer/bodybuilder in the DAF Truck Configurator (valid for 20 weeks) or by the salesman in the DAF Sales program (valid until vehicle build date)
